

**ELSTEAD LIGHTING POISED TO LAUNCH THE QUINTESSE COLLECTION**

Elstead Lighting will launch its new Quintesse Collection in June. Quintesse aims to bring lighting products to market with unique and memorable design, to create impact wherever they are used. Featured is the Facet range, which features a bold hexagonal design for a contemporary

statement. This integrated LED light is IP44 rated for bathrooms and has a single or double light option in the range. It is shown in Heritage Brass, but is also available in Polished Chrome or Matte Black. To request a catalogue, contact [marketing@elsteadlighting.com](mailto:marketing@elsteadlighting.com). **CHELSON PRODUCT WATCH – LED EYE**

As part of Chelsom's latest collection, Edition 27, Chelsom wanted to move on the aesthetics of a bedside reading light whilst developing function and light output. The starting point was to create a product which was inconspicuous, in that it nestled successfully into a headboard with minimum projection and yet was cool and stylish to look at when guests first entered the room.

Development led to a compact and slim outer vessel which surrounded the 'eye', a sculptured cast metal piece which invites the hotel guest to open the eyelid, thereby illuminating the light and allowing a full range of movement to create the perfect light spill. Much time and engineering skill went into prototype development, ensuring that the cast centrepiece revolves and rotates with the lightest of touches and can be easily opened to operate the microswitch and closed to extinguish the light.

The highly tactile, moulded centrepiece remains extremely slim with a subtle curve at the bottom edge. Once opened, the warm white LED light passes through a high-quality focusing lens to create the perfect reading light.

The product comes in six different standard finishes: Matt White, Brushed Brass, Brushed Nickel, Satin Black, Brushed Nickel with Satin Black, Brushed Brass with Satin Black. Combination finishes are also available under special order, giving a contrast between the outer vessel and internal moulded eye. The product is CE and UL certified and represents great value given its high-quality function and superb finishing – attributes that secured the product a globally renowned Red Dot award for product design.
