

## CUSTOM CEILING RANGE FROM CHELSOM

It is Chelsom's agility in design and manufacturing that allows them to work to the precise briefs put forward by the interior and lighting designers they work with. Whether being asked to make simple modifications to existing products or create 100% bespoke pieces, Chelsom will always offer a solution to their clients.

Chelsom's Custom Ceiling ranges

enable clients to customise initial design concepts to create a huge variety of different looks and effects. Each range shows a core design proposal where there is then the option to customise a number of different features such as finish, size and scale, as well as adding a number of different decorative accessories.

Products can be specified and purchased as shown on the company website using the product references provided but should you wish to customise these ranges in any way, get in touch with Chelsom's customer service team who can immediately help to create something totally unique for any interior project.
