One of the world's leading designers, manufacturers and suppliers of decorative lighting

Since launching in 1947, Chelsom has earned its global reputation as one of the world's leading designers, manufacturers and suppliers of decorative lighting to the international hospitality and marine markets.

In collaboration with some of the world's most renowned interior designers, Chelsom designs have been specified for some of the most prestigious hospitality projects across the globe making them a key member of any hospitality or marine project team.

Chelsom lead with design and prides itself on creating its entire standard lighting range in-house. Designed with hotel and cruise ship requirements at the core, the latest collection *Edition 25* has been created by Robert and Will Chelsom and is a truly eclectic lighting range that harnesses and refines the latest trends in finishes and materials while incorporating the most up-to-date lighting technologies.

From the retro-inspired *Reflector* range to the Nordic influence of the *Stockholm* table lamps, there is something to enhance any interior scheme at all price levels.

Aside from the extensive product range on offer, Chelsom also excel in creating bespoke lighting designs. The eagerly anticipated launch of boutique hotel The Beekman in New York in Autumn 2016 demonstrates Chelsom's capabilities perfectly and illustrates how Martin Brudnizki's complex lighting

design concepts have been brought to life. Designers are pushing boundaries more than ever before, and as a result, lighting is inevitably becoming a lot more central to many design schemes.

Retro lines, unusual forms and colours dominate the eclectic interior scheme created by the team at Martin Brudnizki.

Noting a distinct shift in the style of hotel lighting schemes over the last 12 months, the lighting in the guestrooms and public areas portrays individuality and eclecticism leaving behind the 'coordinated' style that had been so popular previously.

Building on their success in the hospitality sector, Chelsom has established itself as the leading lighting specialists for the international marine marketplace.

A hard earned reputation coupled with a comprehensive knowledge of specific marine requirements has seen their lighting designs installed on cruise ships for an enviable client list, including Royal Caribbean's *Harmony of the Seas*, *Regent Seven Seas Explorer*, Cunard's *Queen Mary 2* and *Crystal Cruises' Crystal Esprit* and *Azamara* to name a few.

Chelsom's capability to manufacture large production runs for cabins as well as the manufacturing facilities to produce striking one-off centrepieces has been demonstrated in several recent projects, most notable of which are the extraordinary pieces custom designed for the public areas on-board *Harmony of the Seas*.

The Beekman, New York

Creating luxury hotels in heritage buildings to meet the demand of the modern lifestyle, is always a challenge and something that needs to be handled with the utmost sensitivity. The Beekman, New York, a Thompson Hotel, whose façade has been a New York City landmark since 1998, managed to do exactly that – to design a stunning hotel oozing of effortless elegance while staying true to its remarkable history...
