Volume Creative explains how it is championing sustainable design

## WORKING TOGETHER

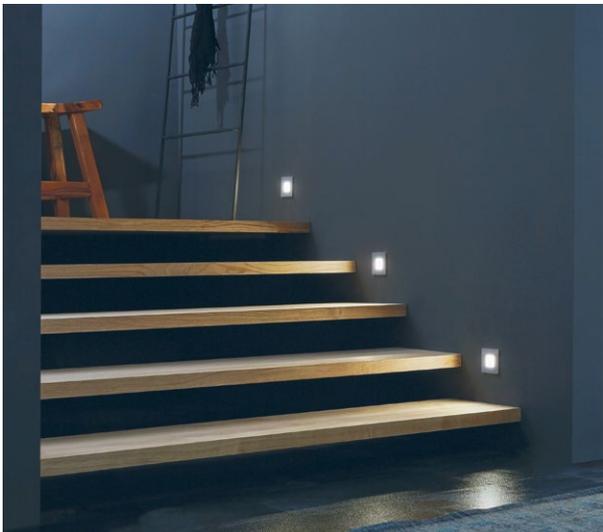

How collaboration helps Royal Caribbean's brands to create innovative ships

## DESIGN LEGEND

Giacomo Mortola reflects on how cruise interior design has changed since the 1970s

Supplier spotlight

# Hera

German lighting company Hera has developed Wall F, a wall-mounted recessed luminaire that can be used as an orientating light in passenger cabins and as an emergency luminaire in cabins and aisles.

The Wall F light operates directly on 230 volts with a power consumption of only 0.9 watts, while Integrated through-wiring saves space and allows for fast and economical installation.

Hera supplied a total of 5,200 Wall F luminaires for P&O Cruises in stainless steel design, with half of the luminaries delivered in an 'up & down' glare-free orientation for passengers.

## Design highlight

Orb is one of the signature ranges from Chelsom's Edition 26 collection, featuring hand-blown glass globes in brushed brass cups with a laser-cut Prince of Wales Check pattern.

## Almaco offers blend-in hand sanitisers

Almaco's hand sanitisers blend in seamlessly to the cruise experience, allowing safety practices to be maintained onboard and help safeguard the well-being of passengers and crew.

The Grand Plaza is the centrepiece of Celebrity Cruises' newest ship, Celebrity Apex. The chandelier is made up from over one kilometre of LED lighting strips.

## Elmo Leather unveils new elmosoft colours

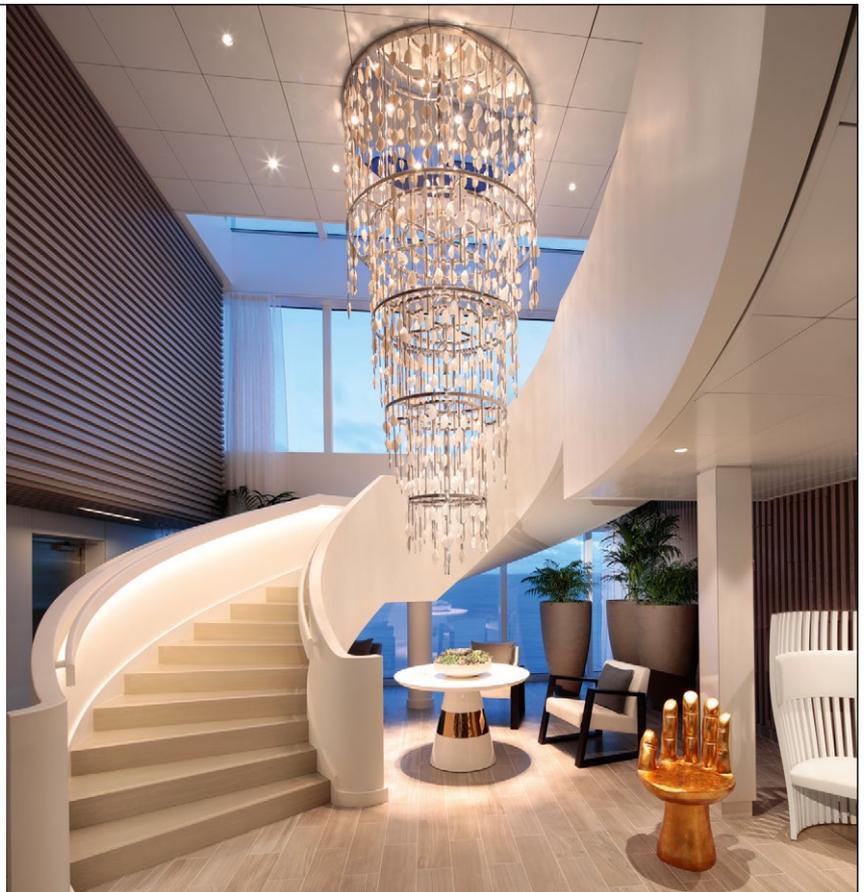

At the start of 2020, Elmo Leather launched its new elmosoft colours at the international furniture trade show, IMM Cologne.

Available in 70 colours, elmosoft is a soft and pliable semi-aniline leather that is suitable for use in public spaces on passenger ships.
