

Sanipex Alpine

Alpine from Sanipex Group's Bagnodesign brand meets the growing desire for personalisation in the bathroom, offering interior designers 19 slab options to choose from. Created with functionality in mind, the basin and shelf collection comprises countertop shelves, plinths and furniture with a selection of freestanding, wall-mounted and countertop styles in several finishes. Featuring a 6mm porcelain slab surface that covers an innovative waterproof foam core, Alpine is completely waterproof, non-porous and resistant to mould and fungus. Installation is simple and efficient too, with tap holes drilled in-house prior to delivery in line with client requirements. For added peace-of-mind, special reinforcements along the joints of each piece serve to enhance its load-bearing properties; the brand's in-house local bearing test process confirms that just one bracket holds a weight of up to 75kg. Alpine is made to order by skilled artisans and can be combined with Bagnodesign's Corsair oak furniture. The range is on display at the new Bagnodesign-Sanipex Gallery in Abu Dhabi, where visitors can browse sanitaryware, furniture and brassware. www.sanipexgroup.com

Chelsom Edition 28

Edition 28 is Chelsom's most eclectic and versatile collection yet, featuring a broader selection of materials and manufacturing skills than ever before. Within the range, artisanal, mouthblown Veneto glass ceiling, table and wall lights have been crafted to meet a variety of customer demands and interior applications. Working in collaboration with specialist Italian glass factories, the British brand has harnessed generations of glassblowing experience and expertise. Both moulded and free-form blowing techniques have been used to create statement pieces that transcend time and are suitable for both traditional and contemporary design schemes. www.chelsom.co.uk
